Chapter 8 Financial Results, Corporate Information

Management's Discussion and Analysis of Financial Position and Results of Operations

[MD&A summary]

1	Assets increased due to expanding business in the U.S. housing market, strengthening built-for-sale business, and investing in the development of logistics facilities, thereby exceeding the financial benchmark
II	Free cash flows was negative due to strong investment opportunities. We are frontloading investments for growth but have tightened our investment benchmark and are striking a balance between growth investments and financial soundness
	ROE is trailing our target of 13% or higher in our 7th Plan, but we are working to improve capital efficiency, including through optimization of the business portfolio
IV	From the perspective of growth potential and profitability, we are building an optimal portfolio Business results by segment > P.110
V	We are actively working to invest in human capital and in Digital transformation (DX) and IT, in an effort to expand our revenue opportunities and to strengthen the business foundation.
VI	We strive to maintain stable dividends, achieving dividend increases for 14 consecutive periods. We continue to realize management conscious of cost of capital and share prices as well as optimize corporate value by conducting dialogue with investors through IR activities

Note: This section analyzes the financial position and results of operations during the six fiscal years from fiscal 2018 to fiscal 2023. For the list of financial data, see "Financial Highlights" on pages 113 and 114.

Financial position

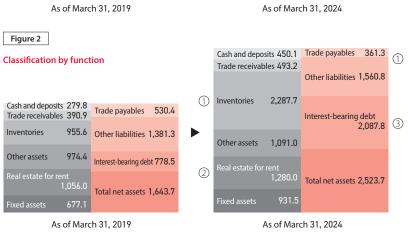

Financial condition

Total assets as of the end of fiscal 2023 increased by ¥391.6 billion from the end of fiscal 2022 to ¥6,533.7 billion. This was mainly due to strengthened purchases of real estate for sales to promote built-for-sale business in each of the businesses and the increase in inventories, in particular for the Single-Family Houses and Commercial Facilities Businesses. Total liabilities increased by ¥256.8 billion from the end of fiscal 2022 to ¥4,009.9 billion. This was mainly due to fund raising through bond issuance and borrowing for the purpose of acquiring real estate for sale and investment properties. Total net assets increased by ¥134.8 billion from the end of fiscal 2022 to ¥2,523.7 billion. This was mainly because net income attributable to owners of the parent of ¥298.7 billion was recorded. which offset shareholder returns, including the ¥87.5 billion in dividends paid to shareholders and ¥87.1 billion in share buybacks. The balance of interest-bearing debt (excluding lease obligations) increased by ¥238.3 billion from the end of fiscal 2022 to ¥2,087.8 billion. The debt-equity (D/E) ratio came to 0.77*1, higher than the target of around 0.6 for financial discipline. However, this owes to active investments in growth, and we are considering capital policies so as to adhere to financial discipline set out for the final fiscal year of the 7th Plan. At ¥2,287.7 billion, inventories account for the largest proportion of assets. As assets are expected to grow in the future due to the acquisition of inventories and investment properties, we will seek to maintain financial health by verifying the optimal capital structure.

Total assets 6.533.7 **Current/Fixed classification** Total current liabilities (1) Total assets 4,334.0 Long-term Total current liabilities liabilities 1,401.8 Long-term 1.288.4 liabilities 2

Figure 1 Comparison of balance sheets (¥ billion)

(3)

Figures are compared with the final year of our Fifth Medium-Term Management Plan (fiscal 2018).

- (1)The current ratio increased from 137% to 238%.
- (2) The fixed ratio dropped from 151% to 118%
- 3 The ratio of fixed assets to long-term capital dropped from 84% to 59%.
- (4) Net assets excluding non-controlling interests grew from ¥1,595.9 billion to ¥2,437.8 billion.
- (1)Inventories increased from ¥955.6 billion to ¥2,287.7 billion (see Figure 3).
- (2)Real estate for rent increased from ¥1.056.0 billion to ¥1.280.0 billion.
- ③Interest-bearing debt (excluding lease obligations) increased from ¥778.5 billion to ¥2,087.8 billion. As a result, the debt-equity ratio increased from 0.49 to 0.77 (after taking the hybrid financing into account).

*1 Calculated by taking into account the 50% equity credit in the hybrid financing (¥150 billion in hybrid bonds (subordinated bonds) issued in September 2019 and ¥100 billion in hybrid loans (subordinated loans) taken out in October 2020).

Message from the CFO The Story of the Group's Value Creation

Our Long-Term Vision and the 7th Plan Developing our Businesses Strengthening our Bases

Financial position

Analysis of asset increases

Inventories as of the end of fiscal 2023 amounted to ¥2,287.7 billion, an increase of 139% compared to fiscal 2018. Major contributing factors include an increase in purchases of real estate for sale for customers considering buying investment properties in each business. The purchases increased, especially in the Rental Housing and Commercial Facilities Businesses, as we strengthened our "capacity to offer comprehensive business ideas on optimally leveraging a land property," one of our strengths. The rise in inventories is also the result of steady expansion of areas in the US housing market where our three US single-family housing companies (Stanley Martin, Trumark, and CastleRock) operate. Looking by segment, the Single-Family Houses Business, which is focused on actively developing built-for-sale business overseas, and the Logistics, Business and Corporate Facilities Businesses, which is selling off logistics facilities and other assets developed in Japan, accounted for a large proportion of inventories.

Investment properties totaled ¥1,595.0 billion, an increase of 48% over fiscal 2018. This includes ¥1,235.0 billion in real estate available for sale*², up 68%, and ¥360.0 billion in profit-earning real estate*³, up 6%, indicating that the increase in real estate available for sale led to a rise in investment properties. This increase was chiefly due to our expanded investment in the development of logistics facilities, which is a profit driver.

The increase in assets is largely attributable to an increase in inventories and investment properties, which is a result of our aggressive investments for growth. Investment decisions are made based on the internal rate of return (IRR) as an important indicator, thus we believe these properties should help us recoup funds and yield profits when sold. In an effort to improve capital efficiency, we intend to continue selling properties at optimal times based on market conditions and other factors.

*2 Real estate available for sale refers to real estate that becomes readily salable after investment to earn profit from price rise. *3 Profit-earning real estate means real estate that we developed to earn rental income.

Figure 3 Inventories

|| Cash flows

Basic approach

The basic approach to cash management is to invest in line with the amount of cash generated by business operations. While our 7th Plan sets a D/E ratio of about 0.6 as a criterion for financial discipline, we may exceed it temporarily due to frontloaded investment in growth as we must actively invest in attractive opportunities. To control the level of interest-bearing debt at around 0.6 in the medium to long term, we have set internal investment benchmark and apply them strictly, thereby balancing investment in growth with financial soundness.

Cash flow condition

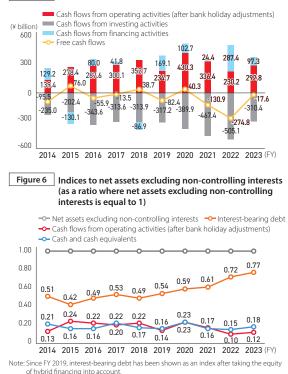

Cash flows from operating activities during fiscal 2023 (adjusted for bank holidays) increased by ¥62.5 billion from fiscal 2022 to ¥292.8 billion. The ratio of cash flows from operating activities to net assets excluding non-controlling interests, assuming equity capital to be 1.0, was 0.12, up 0.02 points from 0.10 in fiscal 2022. This was mainly due to ¥455.8 billion recorded in income before income taxes, despite payment of corporate income tax and the purchase of real estate for sale. Cash flows from investing activities were - ¥310.4 billion, due to the acquisition of real estate for rent, etc. and the implementation of the ¥248.6 billion investment into the real estate development business based on the investment plan under the 7th Plan. As a result, free cash flows (cash flows from operating activities + cash flows from investing activities) were -¥17.6 billion. For cash flows from financing activities, despite progress with shareholder returns by way of dividend payments and share buybacks, we raised funds through bond issuances and borrowings for the purpose of acquiring inventories and investment properties. As a result, cash flows from financing activities come to ¥97.3 billion.

Strengthening our Bases

Cash flows

As a result of the above, the balance of cash and cash equivalents at the end of fiscal 2023 was ¥439.5 billion, an increase of ¥93.4 billion from the end of the previous fiscal year.

III Profits and losses

Return on equity (ROE)

360

270

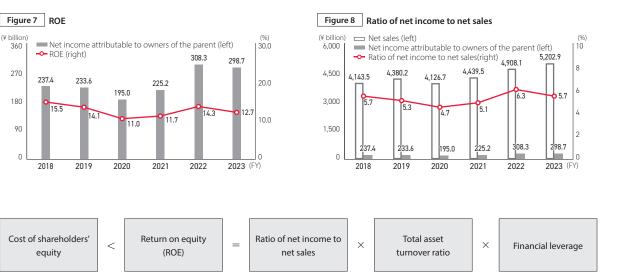

180

90

Return on equity (ROE) came to 12.7%. In the 7th Plan, we have set a management target of ROE of 13% or higher. In fiscal 2023, we sold the resort hotels business and removed listed subsidiary Cosmos Initia from consolidated accounts, but we will continue with efforts to improve capital efficiency from various perspectives, including optimization of the business portfolio and reductions in inefficient assets, achieving the target on the back of both profit growth and shareholder returns.

(Breakdown of ROE) Ratio of net income to net sales

Net income attributable to owners of the parent amounted to ¥298.7 billion and the average annual growth rate for the period of six years starting from fiscal 2018 was 4.7%. Net income margin was 5.7% and trending toward recovery, even excluding the impact from amortization of actuarial differences in retirement benefits. Despite escalating material prices and fuel costs still having an impact, the improvement in earnings for the hotels and other businesses that had been hurt considerably by the pandemic, led to an improved profit margin.

(Our shareholders' equity cost: 7.0%)

Message from the CFO The Story of the Group's Value Creation

Our Long-Term Vision and the 7th Plan Developing our Businesses Strengthening our Bases

||| Profits and losses

(Breakdown of ROE) Total asset turnover ratio

Net sales amounted to ¥5,202.9 billion and the average annual growth rate for the period of six years starting from fiscal 2018 was 4.7%. Total asset turnover ratio*4 was 0.82, declining 0.02 from the previous fiscal year. The Group's business used to be primarily construction contracting, but areas that require upfront investment such as real estate development are increasing their share of the overall total. In line with this, the proportion of sales from investment properties in net sales is rising (see **Figure 10**). We are also strengthening our built-for-sale business selling land and buildings. The inventory turnover ratio is likely to fall due to the change in our business model, but we will continuously seek to ensure and improve the effective utilization of assets through measures that may include encouraging the sale of inventories and also selling investment properties and cross-shareholdings while maintaining a balance between the stock business and the flow business.

*4 Average during the fiscal year.

Figure 10 Sale of development properties

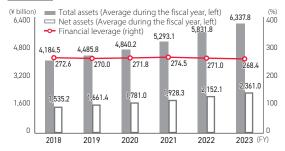

(Breakdown of ROE) Financial leverage

Net assets excluding non-controlling interests amounted to ¥2,437.8 billion and the average annual growth rate for the period of six years starting from fiscal 2018 was 8.8%. Our financial leverage*⁵ was 268.4%, down 2.6 percentage points from the previous fiscal year. By setting a D/E ratio as a financial benchmark, we strive to secure funds for growth investments and solidify our financial base while controlling the financial leverage.

*5 Total assets and net assets excluding non-controlling interests are calculated as averages during the fiscal year.

Figure 11 Financial leverage

Return on invested capital (ROIC)

Net operating profit after tax (NOPAT)*⁶ was ¥305.5 billion and return on invested capital (ROIC), a ratio of NOPAT to the invested capital (= Net assets excluding non-controlling interests + Interestbearing debt)*⁷ of ¥4,329.6 billion, was 7.1%. To realize return on invested capital with capital efficiency that exceeds the cost of shareholders' equity, we strive to improve ROIC at the frontline of business, with an attitude of "being complete in small things" as illustrated in **Figure 13**.

*6 Net operating profit after tax (NOPAT): Operating income × (1 - Effective corporate income tax rate)

*7 Average during the fiscal year.

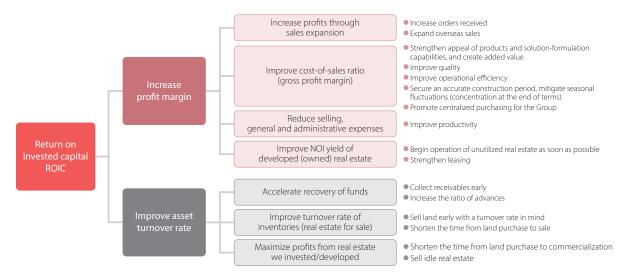

Figure 12 Return on invested capital (ROIC)

Strengthening our Bases

Profits and losses

Figure 13 Efforts to Improve Return on Invested Capital (ROIC) at Sites

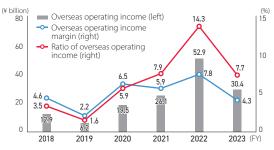

Overseas business performance

Net sales and operating income from the overseas business amounted to ¥705.9 billion and ¥30.4 billion, respectively. The average annual growth rate for the period of six years starting from fiscal 2018 was 20.4% for net sales and 18.8% for operating income. The overseas business's weighting in our earnings is on an uptrend and has constantly exceeded 10% of total net sales. The Company is actively engaged in businesses overseas such as M&A of housing companies in the US and overseas real estate development. In the 7th Plan, we have set accelerating growth of community-based overseas business as one of the focal themes, and are targeting overseas net sales of ¥1 trillion and operating income of ¥100 billion in the final year of the 7th Plan.

Message from the CFO The Story of the Group's Value Creation

Our Long-Term Vision and the 7th Plan Developing our Businesses Strengthening our Bases

IV Business results by segment

Profitability analysis

More than 85% of operating income is accounted for by the three segments of Rental Housing, Commercial Facilities, and Logistics, Business and Corporate Facilities.

Although the Environment and Energy Business constituted only 2% of net sales, the Company is working actively to contribute to the spread of renewable energy to realize a carbon-free society.

For the Single-Family Houses Business, we expect a decline in the number of new housing starts but are striving to improve profit margin by pursuing managerial reform, centered on strengthened built-for-sale business.

Operating income margin to segment assets

Inventory balance is increasing due to the promotion of built-forsale business, but the Rental Housing Business showed higher operating income margins to segment-specific assets, thanks to contribution from the contracting business and rental management business.

In the Logistics, Business and Corporate Facilities Business, we are aggressively investing in long-term large-scale developments to address the growing markets of logistics facilities and data centers. The current return on assets is at a low level because construction investment is currently underway in the land we acquired, but is expected to significantly contribute to cash flows at the time of payback in the future.

Investments in businesses

With regard to investments in businesses, we are working to maintain aggressive investment with a view to sustainable growth. Our investment is expanding in the Logistics, Business and Corporate Facilities Business centered on logistics facilities as a profit driver, and in the Commercial Facilities Business which brings out the potential of regions and contribute to job creation and prosperity. In addition, investments in new businesses and overseas businesses, etc. will be made to develop new revenue streams through the use of funds generated by the above-mentioned segments.

Message from the CFO The Story of the Group's Value Creation

's Our Long-Term Vision and the 7th Plan Developing our Businesses Strengthening our Bases

V Investments

Returns to employees

One of the essential elements for sustaining growth is to maintain and improve the living environment of employees. Employee salaries in fiscal 2023 on a non-consolidated basis increased by ¥11.4 billion from fiscal 2018 (an average increase of 6.3% or ¥572,000 per employee).

The ratio of employee salaries to operating income*⁸ was 39%, showing no significant change in fiscal 2023. For the third consecutive year, we increased base pays in April 2024 and will actively promote investments in human resources, which are the important source for growth.

*8 Employee salaries/(Operating income + Employee salaries) Employee salaries include bonuses and non-standard wages.

IT-related investments and research and development (R&D)

IT-related investments in fiscal 2023 were ¥28.7 billion, an increase of 137% over fiscal 2018. IT-related investments are positioned as key for promoting new value proposals and business model changes by improving the quality of services for customers, strengthening supply chains, and back office digitalization. Therefore, we will continue actively investing funds in this area.

R&D expenditures in fiscal 2023 were ¥10.9 billion, of which ¥4.4 billion was for the housing field, and ¥6.4 billion for the business field and other businesses. Our research and development activities range from basic and applied research to the development of new technologies and new products, and further to utilization and verification of these new technologies in architectural structures and community development.

Capital investments

Capital investments (excluding investments in real estate development) were ¥107.1 billion. We are working to upgrade factories in Europe and Japan and improve production lines. We opened a new factory in Germany for modular construction in September 2023. Modular construction is a method of construction where building units are made in factories for assembly on work sites. It not only shortens construction times but also contributes to the circular economy by enabling recycling of waste in factories and disassembled steel frame units. The German factory has the production capacity to meet diverse needs, including for seniors facilities, for which demand is likely to be considerable, as well as for apartments and school dormitories. Additionally, to tackle the construction industry's challenge of a decrease in the number of engineers and technicians, we are also aggressively investing in digital transformation (DX) to advance the digitalization of the construction process.

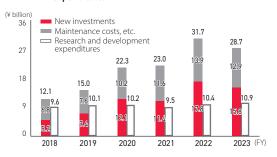

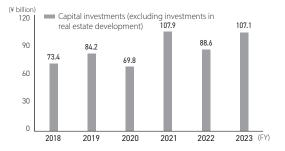

Figure 21 Capital investments (excluding investments in real estate development)

Message from the CEO Message from the CFO

The Story of the Group's Value Creation Our Long-Term Vision and the 7th Plan Developing our Businesses Strengthening our Bases

VI Shareholder returns and stock prices

Shareholder returns

In fiscal 2023, our annual dividend was ¥143 per share, for a dividend payout ratio of 31.3%, achieving dividend increases for 14 consecutive periods. The dividend payout ratio was 31.3%, which would be 35.1% when excluding amortization of actuarial differences in retirement benefits. Our 7th Plan increased the target payout ratio to 35% or more, up 5 percentage points from the previous 30%. We return profits to shareholders in line with business performance, and from fiscal 2024, we have revised our minimum annual dividend from ¥130 to ¥145 as we work to maintain even greater stability with dividends.

In addition, 7 million shares of the Company's own stock were cancelled in May 2023, and a buyback of 17.18 million shares (at a total acquisition cost of ¥79.9 billion) was carried out in January 2024.

Note: The changes in the dividend payout ratio for fiscal 2015 and fiscal 2022 are mainly due to the revision of discount rates used to calculate retirement benefit obligations.

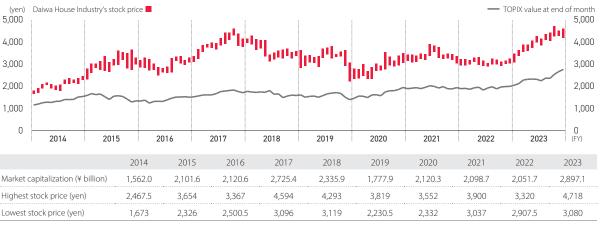

Price to book-value ratio (PBR)

Book value per share (BPS) amounted to ¥3,810.21 and the average annual growth rate for the period of six years starting from fiscal 2018 was 9.6%. Price to book-value ratio (PBR) came to 1.19 times, marking an improvement from the year-earlier PBR of below 1.00 times. However, we are not satisfied with the current share price and will work to improve capital efficiency through continuous ROE improvement and optimization of the business portfolio. Furthermore, we work to enhance our financial soundness and governance and optimize corporate value through dialogue with investors through our IR activities.

Figure 23 BPS/ PBR

Note: The highest and lowest stock prices are those quoted on the First Section of the Tokyo Stock Exchange before April 3, 2022, and on the Prime Market of the Tokyo Stock Exchange after April 4, 2022. Market capitalization is calculated as end-fiscal year close price x end-fiscal year total issued shares (excluding treasury shares).

Strengthening our Bases

Editorial Postscript

Targeting the next ¥5 trillion to make Our Hopes for the Future happen

This year, Daiwa House Group attained net sales of ¥5 trillion ahead of the 70th anniversary of our founding in 2025. I would like to express my heartfelt gratitude to the support of our shareholders, institutional investors, and all other stakeholders.

"Our Hopes for the Future (Our Future Landscape: Celebrating the Joys of Life)" is our compass as we implement our sustainability strategy for business and infrastructure in the journey to our centennial in 2055. It was adopted in May 2022 after a series of discussions about the future society we want to create, incorporating the views of diverse stakeholders. We aim to achieve sustainable growth by

performing the role of creating social infrastructure and lifestyle culture rooted in regeneration and circularity, converting the joy we create for people into economic value to the tune of ¥10 trillion in net sales.

We are putting into practice management with an awareness of cost of capital and our share price. Our PBR was 1.1 times at the end of May 2024; we are aware that we have challenges, including the improvement of profitability. Although Japan has had a zero interest-rate policy for many years, we will once again become a country with positive interest rates. To ensure that employees were aware of interest rates' importance, Daiwa House's founder used to tell them that interest works for us even while we sleep. We need to make sure all employees are conscious of interest rates, and to deliver the message internally and to the public that our capital efficiency is improving, because our recent growth investments have exceeded the cost of capital. We intend to make solid progress by optimizing our business portfolio while preserving the uniqueness of Daiwa House and accelerating our investment in people and digital transformation, in preparation for the next stage of growth.

In closing, we would like to express our appreciation to all who have taken the time to read this report. We hope stakeholders will continue to deepen their understanding of the Group's business activities and provide even greater support as we move forward.

Developing our Businesses Strengthening our Bases

Our founder, Nobuo Ishibashi (1921-2003)

night, we dream. We also often refer to the past as "seeming like a dream." But for us at the Daiwa House Group, these definitions of the word can be put to one side.

When we use the word "dream," which to us is very important, we are referring to hopes for the future. Dreams are the driving force behind great achievements. Managers must be a good judge of the capabilities of their staff. Employees, too, must have a dream in their hearts. Companies grow along with the realization of such dreams. A company's management and staff must all keep on trying to make their dream reality, and must never give up.

Our founder, Nobuo Ishibashi
